

~ Foundation Stage~

Spring 1 Week 2

### Understanding the World:

This week we will continue looking at Rain by Sam Usher. We will investigate why objects float and sink and use this knowledge to design our own boat, using a range of different materials. We will then have a go at floating our boat!

Please could you bring in any junk modelling that you have at home, ready to make our boats. Thank you!

### Foundation

**Phonics:** This week we will recap the phonemes we have learnt so far and learning two new phonemes; **igh** and **oa**

### Maths: Problem Solving

We will play with, explore and identify patterns. We will create and extend repeating patterns involving two, three and four items including colour and shapes. We will also begin to recognise and identify odd and even numbers and count in 2s.

### Bunnies

We will continue to learn and sing lots of nursery rhymes about the weather and seasons. We will practise counting items accurately from a set and to recognise numbers 1-10. We will also continue to practise writing our names.
