

Year 6 Maths Objectives Spring 2

Geometry

We will draw, translate and reflect simple shapes on a four quadrant grid.

We will recognise and build simple 3-D shapes including making nets.

We will compare and classify shapes based on their properties.

Ratio and Proportion

We will solve problems involving the relative sizes of two quantities.

We will solve problems involving similar shapes where the scale factor is known or can be found.

We will solve problems involving unequal sharing and grouping.

Algebra

We will use simple formulae.

We will generate and describe simple linear number sequences.

We will express missing number problems algebraically.

Statistics

We will interpret and construct pie charts and line graphs and use these to solve problems.
